### The Next Generation of Asset Tracking

Nox: Find it anytime, anywhere.

### INVENTORY, WAREHOUSE AND SURVEILLANCE USING RFID:

RFID adoption leads to significant jump in efficiency and accuracy of asset tracking and inventory due to long read range (40 Feet) and fast read up to 100 items per second. World's top 10 Retail giants have switched to RFID.

We provide end to end solution for Asset tracking, inventory and surveillance using RFID technology. We provide video integrated RFID solution for your Asset tracking and surveillance. Our RFID solution is used for visitor tracking in large events, Jewelry inventory and tracking, Asset tracking, employee and Asset check in/Check Out, document tracking, and supply chain management in retail and dept. of defense to name a few.

SimplyRFID solution is used by more than 2000 customers in USA and more than 70% requirements of US defense in RFID are met through SimplyRFID solution. Food and Drugs departments of USA are one of largest users of SimplyRFID solution.
